-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fan claimed in claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 2835

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There are no any drawings and description of the structure claimed in claim wherein said component is a fan.

#### ***Double Patenting***

4. Claim 16 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 2. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2, 8, 10 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Liao et al (US Patent 6,377,449).

Art Unit: 2835

Liao et al teach an apparatus for securing a component to a computer chassis, Figs. 1-7, comprising: a cage 10 coupled to a computer chassis 90, said cage is for holding a hard disk drive 85; and a clamp 50 coupled to said cage 8 to secure said disk drive 85 to said cage 8, wherein said clamp 50 is pivotally coupled to two opposing sides 14 of the cage 8.

7. Claims 1, 11 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin et al (US Patent 6,293,636).

Lin et al teach an apparatus for securing a component to a computer chassis, Figs. 1-12, comprising: a cage 6 coupled to a computer chassis 2, said cage is for holding a hard disk drive 14; and two clamps 8 coupled to opposite sides 18 of said cage 8 to secure in unison or release in unison said disk drive 14 to/from said cage 6.

***Allowable Subject Matter***

8. Claims 18-19 are allowed.

9. Claims 3-7, 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter: The apparatus of claim 1 further comprising at least one biasing element operable to bias said clamp to an engaged position (claims 3-5); The apparatus of claim 1 further comprising at least one biasing element operable to bias said clamp to an disengaged position (claims 6-7); The apparatus of claim 11, wherein said second clamp is coupled to said first clamp (claim 12); The apparatus of claim 11, wherein said

Art Unit: 2835

second clamp is pivotally coupled to two opposing sides of said cage (claim 13); The apparatus of claim 16 further comprising a second clamp pivotally coupled to said two opposing sides, said second clamp being also coupled to said first clamp (claim 17); An apparatus for securing a component to a computer chassis, comprising: a cage coupled to said computer chassis to hold said component; and a clamp comprising: a first side member coupled to a first transverse member of said cage; and a second side member coupled to a second transverse member of said cage opposite said first transverse member (claims 18-19) .

11. The prior art made of record provided in the PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Datskovskiy whose telephone number is (571) 272-2040. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on (571) 272-2092. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
